BSL Land Use Management Plan – controlled burning of bushland on Boyne Island

In partnership with the Queensland Fire and Rescue Service and the Tannum Sands Rural Fire brigade, BSL will be carrying out a controlled burning of BSL managed bushland on Boyne Island commencing on **Saturday 20th June 2009**.

The controlled burning will take place between 7am and 7pm and includes areas of BSL managed bushland behind neighbours on Orana Avenue, Amaroo Street, Benowa Court, Shara Court and Alkina Crescent, Boyne Island.

For a map showing these locations please click on this link
<http://www.gilg.com.au/document/show/52>

The start and continuation of the controlled burn is dependent on favourable weather conditions as determined by the Queensland Fire and Rescue Service, such as wind speed and wind direction. This is to ensure that any smoke is dispersed quickly over vacant land areas to the west of BSL.

The controlled burning will be taken within the boundaries of Queensland Fire and Rescue Service permitting.

The controlled burning program is part of BSL's Land Use Management Plan and is necessary to manage the hazard of bushfires while maintaining the biodiversity values of the bushland under BSL management.

Please contact BSL Community Relations with any questions.

The Boyne Smelters Limited team is committed to keeping the Gladstone regional community informed.

Boyne Smelters Limited thanks the community for their ongoing support For more information please contact 1800 886 414
